

HOSTED BY:  Swedish Energy Agency

POWERED BY:  Cleantech Scandinavia

Welcome to Stockholm Dec. 1-2, 2025

1,5 days - Full conference, Investor Cleantech Tour & Networking Reception

Sweden Sustaintech Venture Day brings together investors, innovators, and industry players to explore the investment opportunities driving the energy transition. Building on Sweden's strong track record in sustaintech, the event showcases leading companies presenting their investment cases to international investors.

- ✦ 200+ international investors and 30+ scaling cleantech companies
- ✦ Immerse yourself in hands-on innovation and real-time site visits
- ✦ Hear from experts within energy, bioinnovation and resilience

Hosted by the Swedish Energy Agency and Cleantech Scandinavia, now in its 7th edition, SSVD turns its focus to the opportunities emerging within the energy transition. As the global energy landscape evolves and innovation accelerates, new possibilities are opening up for private investors. Flexibility solutions are stabilizing the grid and decentralized energy systems are transforming how energy is produced and shared, geopolitics are putting new demands on the energy landscape, and new materials are redefining industrial sectors.

Thank you to our amazing partners!

17:30 JOINT NETWORKING RECEPTION

Wrap up the day with a relaxed networking dinner together with investors, founders and partners of Sweden Sustaintech Venture Day. Expect good food, great company and plenty of opportunities to connect with both familiar faces and new contacts across the sustaintech ecosystem.

Address: Café Opera

Karl XII:s Torg 5, 111 47 Stockholm

Agenda | Tuesday Dec. 2

09:00-09:30 | Welcoming Words

Join us for an interactive day filled with insights from our experts across the cleantech landscape. The event is kickstarted with a few welcoming words, intertwined with industry wisdom, from three experts with the funding landscape.

10:10-10:50 | Pitching session 1: Who's in the room?

This is a fast, get-to-know-you pitching round where each company has ~2 minutes to introduce who they are and what they do. The goal is simply to give everyone a quick snapshot of who is there so investors can spot who they want to engage with further.

11:20-11:50 | Fireside Chat: Investment & Infrastructure

This panel explores the critical interface between venture-backed solutions and infrastructure investment, examining how early-stage innovations can move faster toward deployment at scale. Join leaders from the investment and infrastructure space as they discuss the opportunities, challenges, and strategies for making real-world impact.

Parallel Sessions

Deep Dives

A Deep-Dive Session is a focused, small group meeting where one company sits down with 5-10 investors to explore the solution, business model, traction, and funding needs. The format prioritizes candid Q&A in a confidential, conversational setting.

Registered investors will receive material ahead of the session.

Agenda | Tuesday Dec. 2

13:30-15:00 | Spotlight Session: Flexibility Makers

Flexibility is becoming the backbone of a smarter, more resilient energy system. Digitalization, storage, and balancing solutions are reshaping how energy is produced, used, and shared — unlocking new opportunities across the value chain. In this session, experts and innovators come together to explore the technologies enabling a flexible energy future, joined by the investors and customers.

13:30-15:00 | Spotlight Session: Bio Innovation

New materials and bio-based innovations are redefining the future economy. From advanced composites to circular & bioengineered materials, breakthroughs in this space are driving sustainability and performance across industries. Here, experts and innovators explore the next generation of materials, joined by investors and customers who are backing and deploying their solutions.

13:30-15:00 | Spotlight Session: Robustness & Resilience

Geopolitical tensions and growing systemic risks are putting new demands on Europe's energy landscape. How can we build an energy system that withstands disruption, adapts to evolving challenges, and ensures long-term security? This session brings together experts, innovators, customers, and investors to explore how resilience can be strengthened across the energy value chain.
